## Revision

Alice is a typical British teenager. She's in a youth theatre group, and she goes to classes twice a week after school. Once a year they do a play or a musical. She also does ballet classes every week. Last year she went to Russia in the summer holidays with her ballet group. This year she has some important exams, so she goes to extra English and maths classes after school. She doesn't have much free time and hardly ever has time to watch TV.
